

MCT OIL POWDER

Create pure flavour, dairy-free

ECD is proud to present the first truly dairy-free product of its kind to be manufactured in Europe. ECD Spray Dried MCT Oil Powder is a free flowing, microencapsulated medium chain triglyceride (MCT) oil. It comprises 50-65% MCT oil encapsulated within a non-GMO corn starch.

MCT Oil Powder offers a clean label, dairy-free nutritional fat source for a whole range of dietetic and performance-related nutritional supplement blends.

Choose from our Coconut Oil or RSPO Palm Oil based Powders, both drawn from sustainable sources. Either way, you can be sure of a pure and vegan-friendly product.

In addition, our MCT Oil Powder is approved by international anti-doping authorities as being free from prohibited products, and it contains no ionized or irradiated components.

KEY FEATURES

- Manufactured at our BRC-accredited, dairy-free spray drying facility
- Vegan, meets growing demand for vegan products
