

## SAFFLOWER OIL POWDER

# The sunshine flower for strong body and mind

Safflower is not just an eye-catching plant, it also has attention-grabbing health and well-being properties.

Safflower oil powder is an excellent natural and vegan source of Omega 6 and Vitamin E. Together, these properties can support healthy weight loss as well as helping to boost your body's immunity function. This helps you to feel healthy and strong from the inside out, as well as ensuring that you get the most out of your training.

This new innovative product satisfies a growing consumer demand for vegan sources of essential fatty acids.

ECD's safflower oil powder is specifically formulated to meet the nutritional, quality and manufacturing requirements of active lifestyle and sports supplements. Our powder is water soluble and cold pressed which gives manufacturers of powder-based nutrition the opportunity to easily add safflower oil to their products. With our new spray dried microencapsulated safflower oil powder, it could not be easier to add a vegan source of Omega 6 and Vitamin E to powder-based nutrition products.

This spray dried microencapsulated safflower oil powder from ECD contains up to 70% Safflower Oil, which is sustainably sourced.

### Hero elements of this trendsetting product are:

- Natural and vegan source of essential fatty acid, Omega 6
- Micro encapsulated to protect against oxidation
- Free-flowing, easy to add to any powder blend
- Convenient, easy to add to shakes
